Good intentions

*Machine translation can support the production of accessible media through automatic transcription, translation, etc.
which can be used for (semi-automatic) subtitling, etc.*

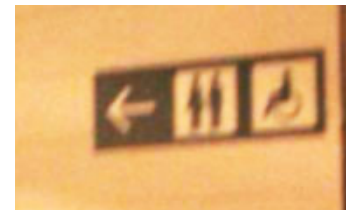

HOW MACHINE TRANSLATION CAN SUPPORT ACCESSIBILITY

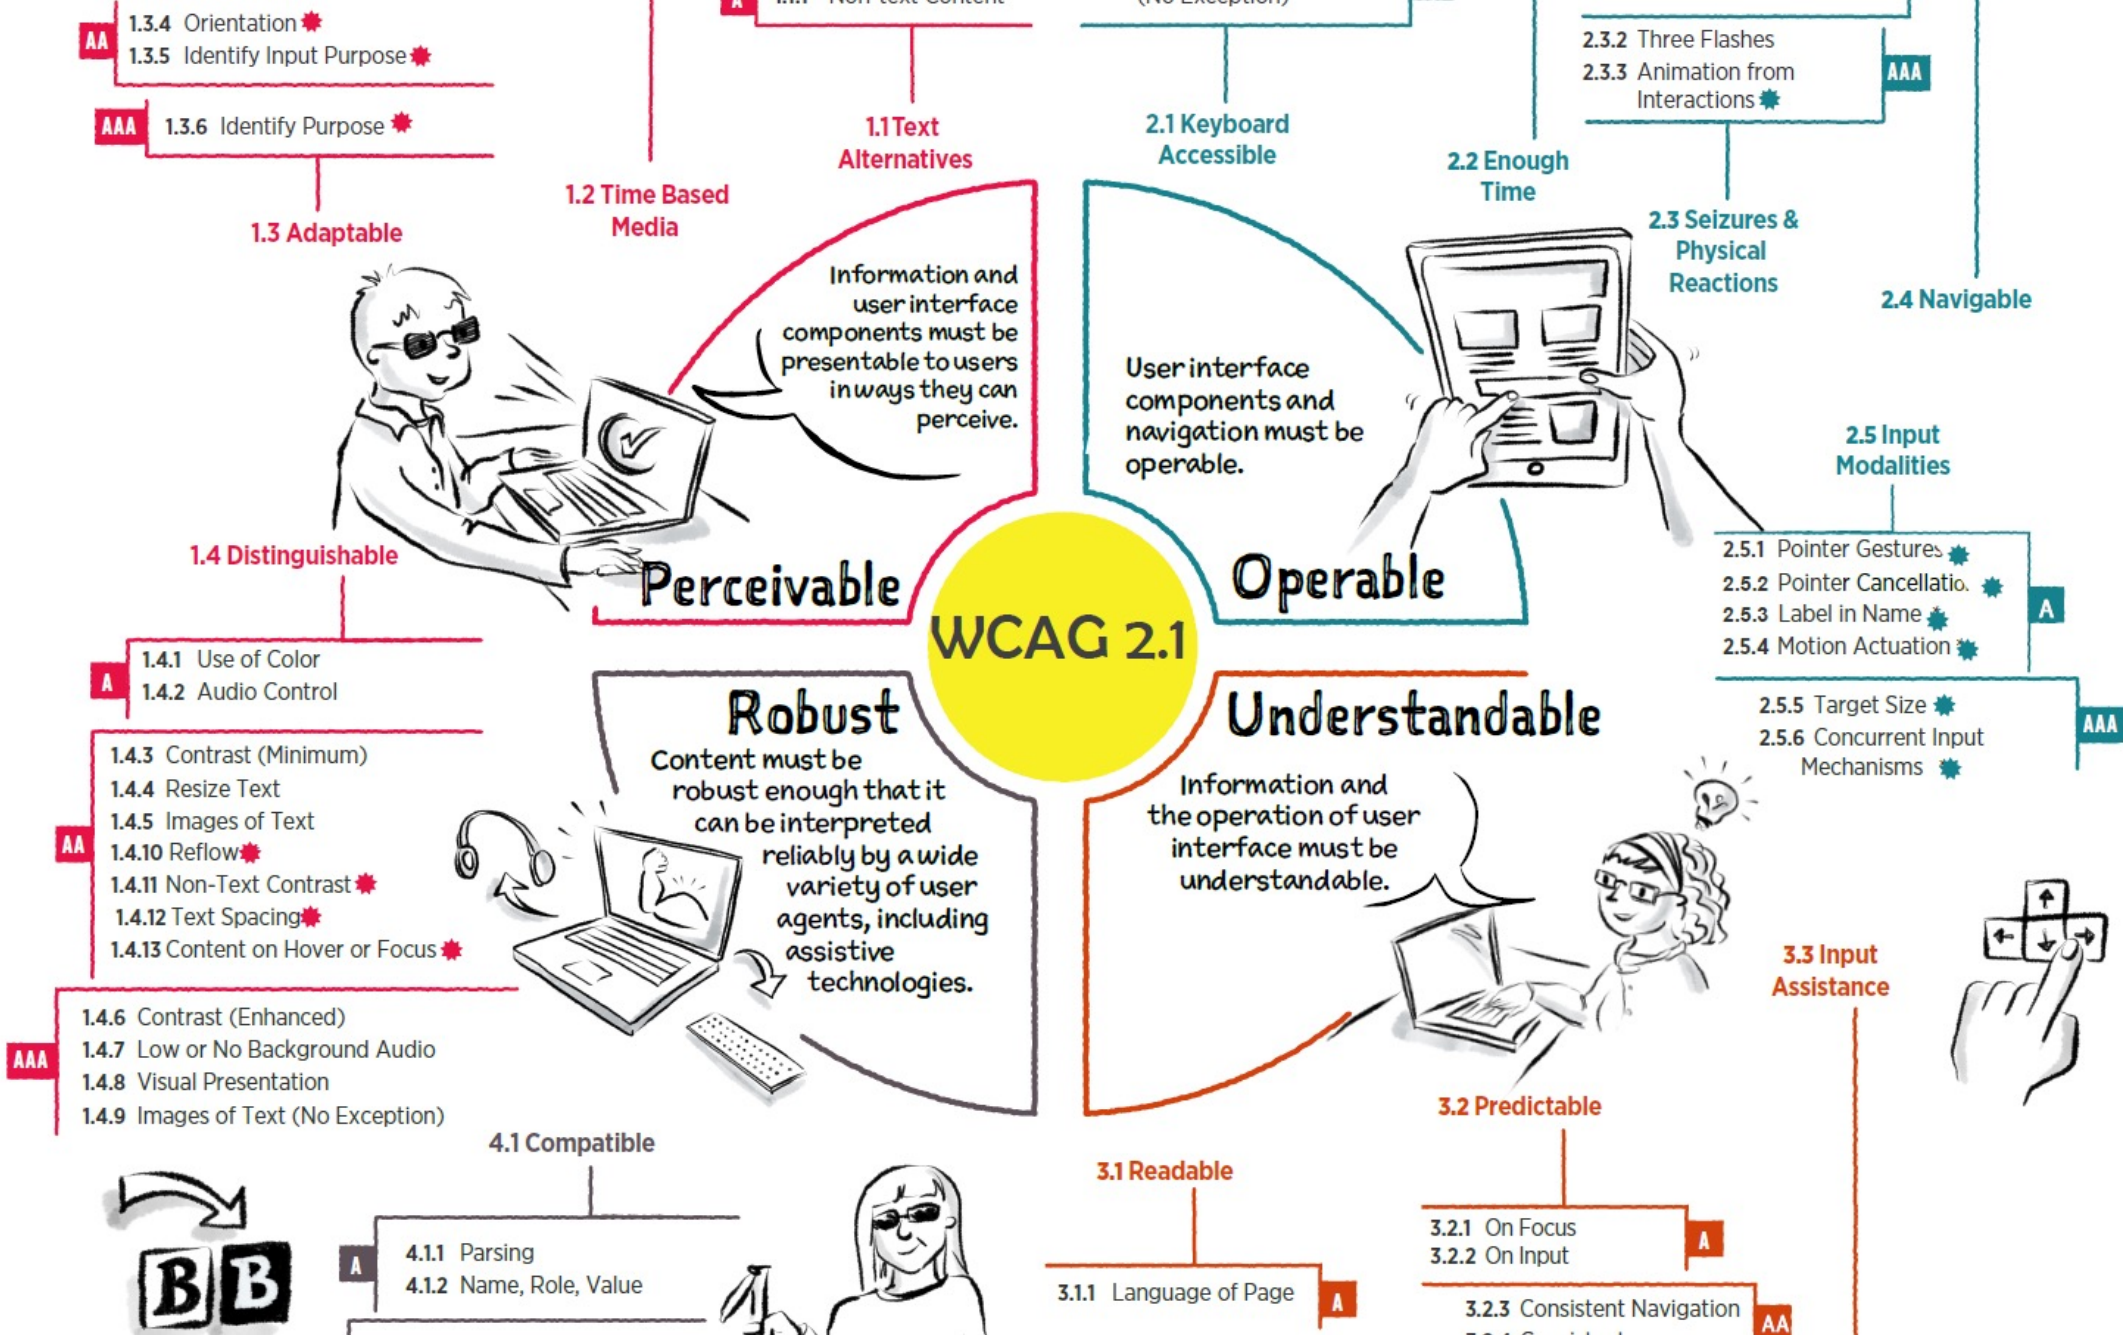

Machine translation can support the production of accessible media through automatic transcription, translation, etc. which can be used for (semi-automatic) subtitling, etc.

HOW MACHINE TRANSLATION CAN SUPPORT ACCESSIBILITY

Everyday advantages of accessible media

- Subtitles in noisy places (pubs, airports, train stations) and/or for silent media (public displays in metro, etc.)
- Synthetic voice reading out online articles in a dark room or when your eyes get tired
- Simple language and clear information
